WHERE I'VE TAUGHT

01 IIM Ahmedabad

02 St. Xavier's, Hansol

03 MBA, BCA & Pharmacy students

04 JEE aspirants

05 Children who had never held a textbook of their own

IN EVERY ROOM, I SAW THE SAME THING

Children don't learn when we explain more. They learn when they can *touch*, *count*, *build* and *play*.

THE TURNING POINT

Teaching underprivileged children with Prof. V. L. Mote, we stopped only explaining and started using physical teaching aids and pretend play.

THE CHILDREN…

↑ laughed more

↑ understood faster

↑ remembered longer

SO I ASKED MYSELF

Why are most toys made only to entertain, when they could also *teach?*

So I started *Wudly Toys.*

🌳 A forest counting toy that teaches "more" and "less"

🔤 Alphospell, an alphabet board in three languages

🚀 Science play linked to real concepts

EYES 2026 HONOURS

Innovator in Foundational Literacy and *Numeracy Solutions.*

Presented by Dr Kiran Bedi. The real reward? A child's face when a concept finally clicks.
