In 20 years of teaching, one thing held true: children understand fastest when an idea connects to *real life.*

From IIM Ahmedabad to a classroom at St. Xavier's.

How a Wudly toy is *made:*

01 Start with a learning outcome, mapped to FLN and NEP 2020 goals

02 Design it as an educator, not only as a toy maker

03 Test it with children in real demo sessions

04 Refine it. Early feedback gave us bigger pieces for small hands

Swipe →

Learning should be *touched*, not only taught.
